

ESAKKI MUTHU

Software developer

PROJECT

Library Management System

The **Library Management System** Project In Java is developed using Java Programming Language. This Library Management System Project In Java And MySQL is simple and basic level small project for learning purposes.

Also, you can modify this system as per your requirements and develop a perfect advance level project.

A **Library Management System** Java Code allows you to keep the student records and manage them when needed. This is a simple java project with a good and interactive-looking GUI. This Project Use MySQL Database for managing all the data that store in the database.

Developed **full stack** application, frontend - Angular and back-end - Node.js MySQL Database.
